DETAILED ACTION***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the hot water return line connected to said hot water line at one end on said manifold with a valve at the other end must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 and 12-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites the limitation "the water supply line" in line 8. There is insufficient antecedent basis for this limitation in the claim. Claim 1 recites the limitation "the line" in line 9. There is insufficient antecedent basis for this limitation in the claim. Claims 2 and 3 recite the limitation "said control panel" in line 1. There is insufficient antecedent basis for this limitation in the claim. Claims 10 and 20 recite the limitation "said solenoid valve" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-9, 11, 14, 15 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Lujan, Jr. (4,606,325). See fig. 1 and **30**, **33** and **36** for the control module, **11** for the water heater, **30** for the switch, **27** for the pump. Regarding claim 2, see col. 3, lines 44-59.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3749

Claim(s) 6, 12, 13, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lujan, Jr. in view of Spicher (5,829,467). Lujan, Jr. discloses all of the limitations of the claim(s) except for the hot water line being purged through the cold water line. Spicher discloses the presence of a hot water line being purged. See col. 3, line 48 to col. 4, line 4. Hence, one skilled in the art would find it obvious to modify the system of Lujan, Jr. to include the hot water line being purged of Spicher for the purpose of instantaneous hot water delivery. Regarding claims 12 and 13, see col. 6, line 52 to col. 7, line 5.

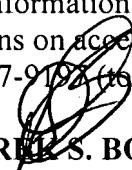

Claim(s) 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lujan, Jr. in view of Spicher (5,829,467). Lujan, Jr. discloses the claimed invention except for the user testing to water flow to find the optimum run time and interval time. It would have been obvious to one having ordinary skill in the art at the time the invention was made to test the water flow, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).
